2ª ed.

GRAFICA DA UNIVERSIDADE
PORTO ALEGRE
1966

A segunda edição dêste Catálogo representa um novo marco na história da «Biblioteca Noely Carvalho» do Instituto de Fisiologia Experimental da Faculdade de Medicina de Pôrto Alegre.

↙ A organização desta biblioteca foi iniciada em 1954, pouco depois da transformação da antiga Cadeira de Fisiologia no atual Instituto de Fisiologia Experimental.

A primeira doação para êste fim, no valor de U.S.\$1.500, foi concedida pela Fundação Rockefeller, a qual, mais tarde, em 1956, voltou a fazer outra doação na importância de U.S.\$5.000. A estas seguiram numerosas contribuições, destacando-se, entre elas, as do Conselho Nacional de Pesquisas.

Em 1955, foi realizada intensa campanha, com o apoio da imprensa, visando angariar recursos no comércio local para ampliar e desenvolver a então incipiente biblioteca. Os resultados foram os mais compensadores. Da comissão encarregada dêste empreendimento fazia parte a Srta. Noely Carvalho, que faleceu antes do término da campanha, motivo por que foi escolhido o seu nome para patrono da novel biblioteca, em reconhecimento pela ajuda inestimável que até aquêle momento prestara.

O notável crescimento, que fez com que em 10 anos passasse ela a ser considerada uma das mais completas bibliotecas do País, no gênero, deve-se, em parte, às doações feitas por professôres e por médicos, e ao sistema de permutas com a United States Book Exchange.

Merece especial registo a generosa doação feita pelo prof. Raul Pilla, antigo professor da Cadeira, de tôda a sua preciosa coleção de livros de Fisiologia, que veio enriquecer sobremaneira o acervo.

A biblioteca ocupa, atualmente, uma área de quase 80 m² distribuída por quatro salas: uma peça que serve para

depósito de livros, duas salas de leitura e uma pequena secretaria. As salas de leitura, conquanto pequenas, são muito silenciosas, bem iluminadas e possuem instalação de ar condicionado, a qual se destina a melhor conservação do valioso material reunido em suas estantes e a atrair e proporcionar conforto aos leitores.

O acervo compõe-se de aproximadamente 4.175 volumes, sendo 1.720 de textos e 2.455 de revistas encadernadas, e mais de 5.955 separatas. Os compêndios e as separatas estão classificadas por assunto e catalogadas por autor, havendo sido adotado o sistema decimal de Dewey, no qual foram introduzidas algumas modificações para atender a certas peculiaridades do serviço.

Recebe a biblioteca, regularmente, 100 títulos de periódicos, dos quais 50 são constituídos por coleções completas, algumas destas começando ainda no século passado e se estendendo ininterruptamente até aos nossos dias. Cada fascículo de revista está convenientemente tombado em fichário do tipo Kardex.

A extensão coberta pela biblioteca limita-se quase exclusivamente aos campos da Fisiologia e da Endocrinologia.

Entre as numerosas obras de grande valor, contam-se algumas reputadas verdadeiras relíquias, como, por exemplo, certas impressas no começo do século XIX; um volume da «Physiologie Générale», de Claude Bernard, que leva a assinatura do autor; e muitas outras que pertenceram aos professores Sarmiento Leite, Fábio de Barros, Raul Pilla, etc.

Além disto, a biblioteca dispõe, também, de aparelhos para a leitura de microfilmes (Spencer) e de microfichas («The Microcard Corporation, Reader Division, West Salem, Wisconsin»). O Instituto conta com bem montado laboratório fotográfico que lhe permite atender, com presteza, pedidos de microfilmes e de fotocópias, bem assim com a aparelhagem necessária para a preparação de termocópias de documentos e mesmo de livros (Thermo-Fax: «The Secretary» e «Companion, model 48»). Todos estes aparelhos foram doados pela Fundação Rockefeller.

A Srta. Nilce A. de Azevedo esteve a cargo da biblioteca de 1956 a 1959. Daí até 1962 coube a direção do servi-

ço à Srta. Olinda Paixão. Desde então, a Srta. Iara Goulart é a bibliotecária responsável auxiliada pelas Srtas. Maria Elisabete Adams e Maria Inês Pilla (bolseiras).

A primeira edição deste Catálogo foi lançada em 1959 e teve ampla distribuição pelas principais bibliotecas do País, o que tem valido à «Biblioteca Noely Carvalho» servir também a outras instituições científicas.

Nas páginas seguintes encontra-se uma relação das pessoas e entidades que contribuíram para a criação e o desenvolvimento deste importante centro bibliográfico nacional.
